

LCT bio.x A100 Intelligent

The latest upgrade of our classic. The LCT bio.x A100 Intelligent brush washbasin offers you what you have always wanted..

With the new technology, the brush washbasin is always ready for use and offers consistent, best cleaning quality without you having to worry about it.

The control box of the parts washer contains the entire technology (electrics, heating, float switch etc.), which simplifies service, repair and cleaning. It uses Intelligent technology to transmit the data collected, allowing problems to be detected before they manifest themselves.

- Extremely soiled parts are cleaned in a safe and environmentally friendly way.
- mobile and easy to use
- The liquid is circulated through the filter system, which guarantees a long service life.
- Optimal depth of the basin for good splash protection

- Intelligent Technology checks the status of the system, such as the level and temperature of the cleaner and the oxygen supply to the micro-organisms.
- the brush washbasin is always in top condition and ready for use
- In the event of deviations, you will be contacted by our customer service and we will agree on the next steps with you. Data protection is a standard feature.
- Saves time and money
- You are sure to have a clean parts washer with the best cleaning performance.
